LUGU

Sügavnööbitus tehnika hakkas mulle huvi pakkuma esamkordest kui nägin sügavnööbitus tehnikas polstrinäidiseid oma loomulikust keskkonnast väljatõstetuna, raamituna nagu pildid seinal.

Tavaliselt tekitab selline stiil ettekujutuse ülikonnas meestest, kes hämarates klubidse sigarisuitsus brändit nööpavad.

Esimest korda märkasin selle tehnika elegantsi ja keerukust.

Kiit ja järi toovad need töövõtted ämarusest välja valguse kätte. Raami ranged jooned tasagaalustavad polstri keerukust. Kiik on mõeldud siseruumidesse. Ideaalne element avalikesse ruumidesse, millega interjööri mängulisust tuua.

THE STORY

The interest in deep-buttoned furniture sparked when I saw several sample of buttoning styles on a simple le board, completely out of its usual context. The buttoned sofa conjures images of formally attired gentlemen sequestered in a dark paneled study, sipping brandy and smoking cigars.

It was a first time when I saw the complexity and elegance of the technique.

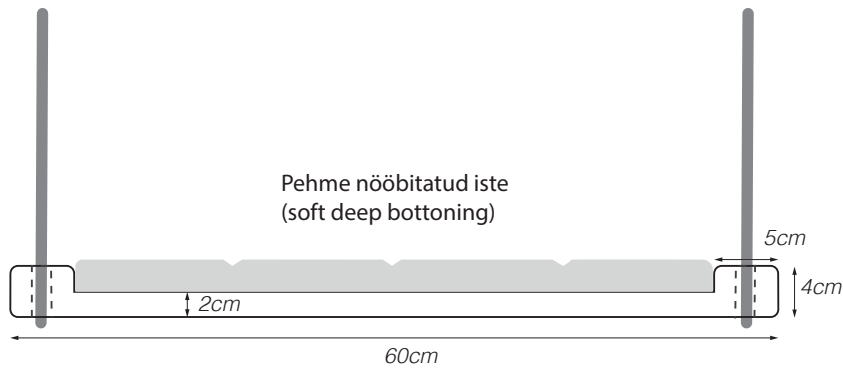

The swing and the low chair/bench take the classical style out of its usual scene. The strict lines of the wooden frame balance the complex soft upholstery.

The swing is designed for indoor use. It is perfect of public spaces like restaurants and hotels that like to bring a bit of fun into their spaces.
