

Architecture in neoclassical furniture

2015

LUGU

See projekt on ideede kogum, mis said talletatud kahe kuu jooksul osaledes K.A.I.R. Košice kunstnike residentuuris. Ühele ideele fokuseerimise asemel, otustasin eksperimenteerida mitmete vormide ja mõtete-ga vabanedes disainiprotsessi tavapärastest konkreetsetst reeglitest.

Inspiratsiooniks said graatsilised ja aukartust tekitavad honed Košice kesklinnas. Jälgisin vaevu hoomata-vat ja elegantset neoglassikalist arhitektuuri 18st sajandist läbi mööblidisaineri silmade. Lihtsad fasaadi-ornamendid muudavad hooned graatsiliseks ja puhtaks. See püüdis mu tähelepanu ja vajab ülessmär-kimist. Projekt näitab ideede arengut läbi kriitselduste fotolel.

Projekt on hetkel mudelite kujul ja ootab oma tootmisaega.

THE STORY

The project is a collection of ideas that were gathered within two months stay at K.A.I.R. Košice Artist in Residence. Instead of choosing one idea for the collection, I experimented freely with many ideas.

The inspirations came from the beautiful and grand buildings located at the center of the city. Looking at the subtle and elegant neoclassical architecture, from the mid 18th century, through the lens of modern furniture. The simple facade ornaments make the buildings elongated and clean. This had to be translated into contemporary furniture. I visualized the idea generation and explaining the design processes via photos and video.

The project is at the maquette stage at the moment and is waiting for its time to be produced.

Tehnilised detailid

Technical details

Marerjalid

Material

Vormitud vineer (molded plywood)

Värv (colour): matt pulber (mat powder)

Mõõdud

Sizes

Kapp (cabinet): 180x80cm

Tool (chair): 83x35cm

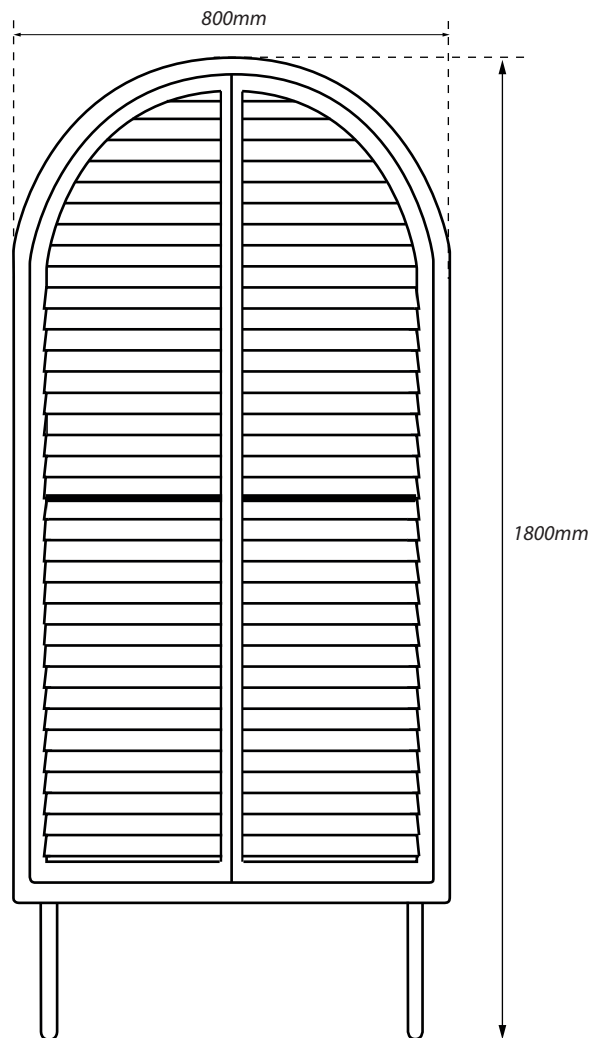

Kummut (chest): 80x150cm

Mudelid (prototypes): 3D print

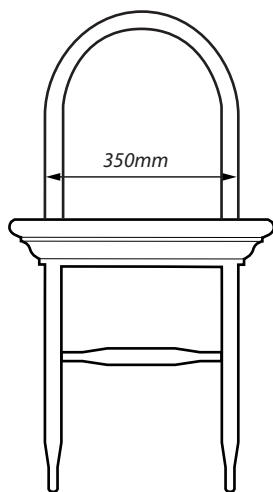

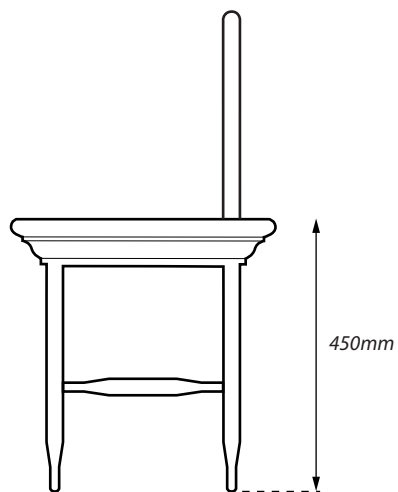

Projekt oli võimalik tänud K.A.I.R.i, Kultuurikatela ja Printibilities abile

Project was possible thanks to K.A.I.R., Kultuurikatel and Printibilities
