

Rebranding Inbank for future growth

To fuel our growth and stand out as a leader in Europe's embedded finance arena, Inbank underwent a makeover, refreshing our strategy and appearance with a new design system. Our updated logo is a fresh take on the original, introduced back in 2015.

At our core, we've always aimed to seamlessly integrate financing solutions into merchants' daily operations, making the process so smooth you hardly notice it. This philosophy is embodied throughout our design system, symbolising our close integration and 'being inside.'

As the finance industry shifts away from traditional banks towards more consumer-friendly approach, we've embraced this in our design. We've maintained our industry integrity while adopting a friendlier and more approachable look. This new direction not only aligns better with our values and culture, but also helps us attract like-minded talent.

These values shine through our entire brand system, from our inviting typography to our adaptable layouts, and even in the playful illustrations that convey our main message.

There's a *smart* way of shopping.
