

// **For beginner**

## Tips for picking a domain name

1. Pick a name that describes your product or service – your domain does not have to be the same as your registered business name (but it can be).
2. Make sure the name is easy to remember and type in. Avoid words that have multiple spellings or common misspellings.
3. Register sooner, rather than later – it's not uncommon for competitors to grab domains for business names that don't have a trademark.
